
a
$t = 0$ s
$t = 2$ s
$t = 10$ s
finite-size
point particles
polymer-rich
crowder-rich
$(p - c)/(p + c)$
1.0
0.5
0.0
−0.5
−1.0
line: median; band: 1st to 99th percentile
chain length (subunits)
time (s)
fraction of chains
finite-size
point particles
chain length at $t = 10$ s (subunits)
b
$t = 0$ s
$t = 1$ s
$t = 10$ s
finite-size
point particles
polymer-rich
crowder-rich
$(p - c)/(p + c)$
line: median; band: 1st to 99th percentile
chain length (subunits)
time (s)
fraction of chains
finite-size
point particles
chain length at $t = 10$ s (subunits)
