
(a)
analytic $Dk/\sqrt{(Dk)^2+\omega^2}$
analytic $\arctan(\omega/Dk)$
measured u/c
measured δ
amplitude u/c
phase lag δ (deg)
ω/Dk
(b)
$\varepsilon^{\mathrm{samp}}$: 0.1 0.2 0.4 0.5
($h=2$; /4 at $h=4$)
fractional deviation from analytic
$h=2$: amplitude
$h=2$: phase lag
$h=4$: amplitude
$h=4$: phase lag
$\varepsilon_\tau^{(1)}$ at $|x_v - c| = 2\sigma$
