
a
Lattice state evolution in a single timestep
t = t0
t = t0 + Δt
y
z
x
①
diffuse
②
structure
③
react
U
low
high
U = free energy
b
Reaction-diffusion for particles smaller than a subvolume
①
diffuse
③
react
U
c
Mobility of hard spheres larger than a subvolume
less crowding, higher mobility
more crowding, less mobility
fractional move
friction + U
friction + U
U
U
d
Polymer relaxation and chemistry
relax
react
friction + U
U only
U
